

## REQUEST FOR COUNCIL ACTION

---

**MEETING DATE:** September 5, 2023

**PREPARED BY:** Derek Asche, Water Resources Engineer

**AGENDA ITEM:** Establishing Pond Maintenance Project Nos. 23-19, 23-20, and 23-21  
Resolution No. 23-134

---

**PREVIOUS ACTIONS:**  
None

---

**RECOMMENDED COUNCIL ACTION:**

Motion to adopt Resolution No. 23-134 establishing projects 23-19 Maple Grove Addition Water Quality Pond Maintenance, 23-20 Meadowview Estates Water Quality Pond Maintenance, and 23-21 Sharp 2nd/Browns Duck Pond Water Quality Pond Maintenance and ordering the feasibility study.

---

**COMMENTS:**

Staff annually monitors the effectiveness of water quality ponds in the city and conducts additional inspections when concerns are received from residents. Water quality ponds capture sediments as well as other materials and are generally expected to need maintenance (dredging) every 20-30 years. Maintenance primarily consists of dredging the ponds to ensure the ponds effectively intercept pollution prior to discharge to wetlands, lakes or streams.

Based on recent monitoring and concerns from residents, staff has identified these three ponds as candidates for maintenance dredging during the winter of 2023-2024.
